The little elf pictured here is the most particular workman we ever saw. Single florets measure 1½ inches across—as large as a good sized pansy. No other hardy Phlox produces florets so large. And the coloring is simply splendid! It is a clear beautiful pink with small carmine eyes. The color does not fade as with many other varieties of Phlox, but stays pure and beautiful throughout the life of the Phlox. Very long blooming—starts in July and continues until frost. **HARDY.**

Here is a sprightly little mountaineer who is tooting his horn, and he has real reason to blow, for he brings you the famous Alpine Midget Rose so long thought lost but now re-discovered.

The beautiful thing about Alpine Midget Rose is the perfect form of its fully opened blossoms and the pretty cupid's-dart buds. These buds open a beautiful vivid red which turns to a dainty pink when the Roses are fully opened. Alpine Midget Rose blooms all summer and fall right up until freezing weather. It's a tiny midget—only 8 to 10 inches high—but for all its tininess, is hardy as an oak and survives the coldest winter weather. Very easy to grow. Give this little elf a home in your garden, and you'll be delighted for a long time to come.

Then the buds appear and it looks like a frightened porcupine with quills all on end; and finally when the blooms appear it looks just like hundreds of tiny rockets all exploding at once—

just like a beautiful little fireworks display. Here is truly beautiful magic for your garden.

Rose Dawn Dianthus, in addition to its beauty, has many advantages. It is perfectly hardy and can stand the coldest winter weather, and the foliage is evergreen—stays pretty the year 'round. It is very low growing and does not run wild or
